

Plan a Health Check up for a Healthy Today and Tomorrow

An Annual Health Check – up is an absolute necessity for adults, senior citizens and even children. Many of us tend to neglect this because of the cost involved and the time constraint.

However, not diagnosing a medical problem early enough could prove far more costly in terms of medical management and would lead to disruption of family life and loss of peace of mind.

Do we need to be subjected to all this?

The K. E. M. Hospital, a 99 year old, multi speciality hospital in the NGO sector with state-of-the-art diagnostic equipment, has launched a range of tailor made packages, developed to cater to the needs of a wide cross section of individuals, at a very affordable cost.

Do something for those to whom you owe so much, for those whom you love --you, your parents, your spouse and your children.

Celebrating your organization's foundation day, silver jubilee, a production landmark?
